

HELP WANTED

A&P or IA Mechanic

Centennial Aircraft Maintenance - Denver, CO

Centennial Aircraft Maintenance is currently accepting resumes for an A&P or IA Technician position at its Denver maintenance base location. Come be a part of a fast-growing company with a great working atmosphere, benefits, and room to grow your career. The Technician is responsible for maintaining an organized and efficient work place while providing excellent on time results.

Job Duties

- Read, understand, and use FAA approved maintenance manuals, illustrated parts catalogs, AD's, Service Bulletins, progressive inspection check lists, and other related maintenance documentation in order to effectively troubleshoot airframe, engine, avionics, electrical, and hydraulic systems.
- Complete required forms properly and accurately to FAA and management standards.
- Complete repair, modification, and replacement of aircraft and aircraft systems.
- Complete work within budgeted time frame.
- Comply with airport and Corporate safety requirements for proper operation of ground support equipment.
- Complete any and all assigned job tasks as required by management team.

Job Requirements

- High School education or equivalent.
- Valid and active A&P rating.
- Must provide own basic tools.
- Must be able to read, write, and understand the English language.
- Must be able to lift/carry up to 75lbs, push-pull, walking, sitting, standing, climbing, kneeling, bending, crouching, and reaching.
- Good communication and analytical skills.
- Prefer several years' experience but not required.
- Prefer Inspection Authorization but not required.

This is a full-time position. Compensation commensurate with experience.
